### **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the specification at page 1, line 6, after "09/849,505, filed May 4, 2001," insert -  
-now U.S. Patent No. 7,020,537,--.

### **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance: (Claims 1 and 23) The prior art does not teach or suggest the combination of using multiple anodes (conductors) disposed in an electroplating cell (reactor) in combination with control of the current flowing in each anode to produce an electroplated layer which has a non-uniform profile. The entirety of the prior art, particularly Wang, was concerned with producing as uniform as possible surface layers. Thus, one of ordinary skill in the art would not have been motivated to have included a controller/control system for forming a final film having a non-uniform profile from the center of the substrate to the perimeter, and in fact teach away from doing so. (Claim 37) The terminal disclaimers filed on 14 April 2006 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of US Patents 6,569,297 and 6,660,137 and any patent granted on Application No. 10/400,186 have been reviewed and are accepted. The terminal disclaimers have been recorded.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Priority***

To clarify the record, the newly amended claims 1 and 23 contain new limitations. However, it appears that this subject matter is supported by 09/849,505 (now US 7,020,537), particularly at col. 4, lines 13-22 of the published patent, and thus continue to be granted that earlier filing date, 4 May 2001.

***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Harry D. Wilkins, III whose telephone number is 571-272-1251. The examiner can normally be reached on M-F 8:30am-5:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Roy V. King can be reached on 571-272-1244. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
